

# **#1 Enterprise eCommerce Platform for High-Performing online stores**

Grow your online store faster with a truly scalable, open source, feature-rich, stable efficient e-commerce software.

# **The fastest and the most resource efficient enterprise eCommerce platform**

Your online store has to be really fast to stand competition in Google and to convert visitors into buyers. PHP7 support, smart cache technology and modern architecture makes X-Cart the best ecommerce solution in terms of speed and resource efficiency. Installed on a average VPS, X-Cart easily handles 500K monthly visitors.

## **1/4 COST**

X-Cart is a quarter of the cost of on-premise solutions like Magento enterprise edition.

## **2X FASTER THAN MAGENTO ENTERPRISE edition**

The latest versions of X-Cart support PHP7 and show much better performance than ever.

# Unmatched in features, unrivaled in flexibility

X-Cart is the most feature-rich, open source enterprise ecommerce platform on market now. Every feature or integration you want is most likely already built into X-Cart or may be added from X-Cart Marketplace in 1 click right from your store's back-end.

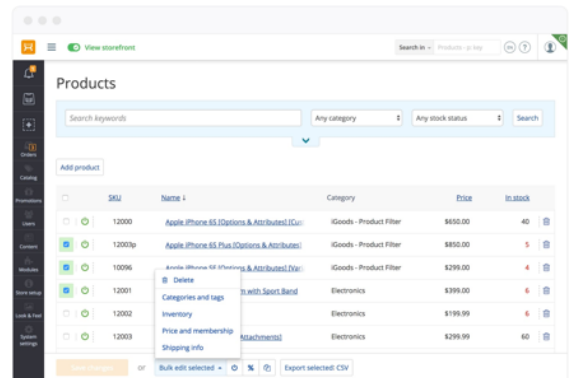

# Stability is the key for successful online business

We do care about stability. State-of-the-art QA procedures and tools allow us to have few-to-zero bugs even though X-Cart in constant development. And all that makes X-Cart the best e-commerce enterprise software for those who want to focus on their business.

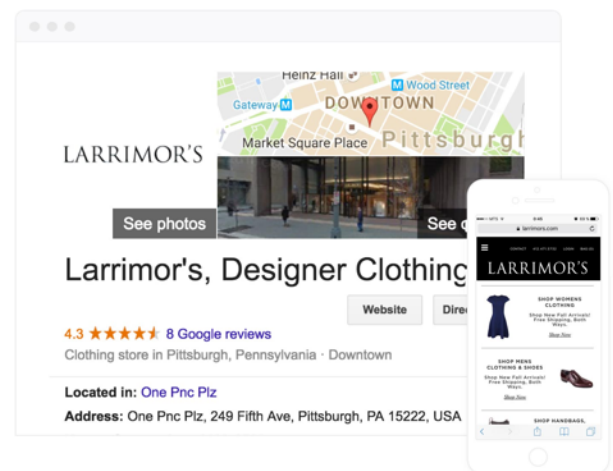

# Content Management without the Hassle

With X-Cart you have 100% control of your content and site structure. Edit your products, categories in bulk with our intuitive interface. Our software solution seamlessly integrates your blog with your ecommerce site. No restrictions.

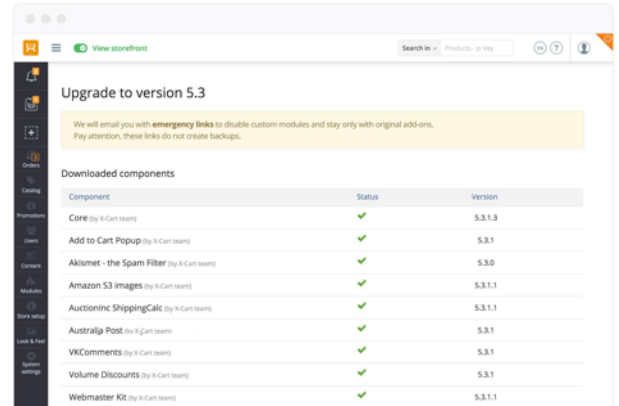

# Build a 100% mobile-optimized and SEO-ready online store

X-Cart lets you create an online store that looks beautiful on smartphones and tablets. It's good for both: your customers and your store's Google rankings. Besides, X-Cart has a whole arsenal of advanced SEO tools to bring your ecommerce business to leading positions in search engines.

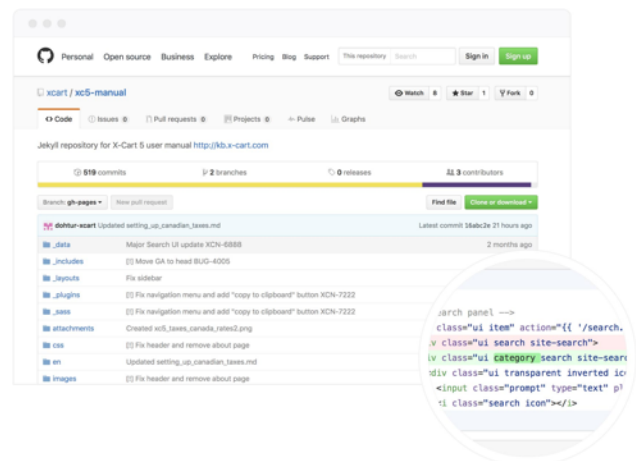

# Ecommerce Software upgrades made easy

Software upgrades have always been a nightmare. Forget it! X-Cart has a modular architecture so upgrades are a lot easier than in other enterprise ecommerce shopping carts. It takes you several clicks to upgrade your store right from the admin area. Want your website to always be up-to-date? X-Cart is the best web store software for that.

# Enterprise Level Open Source Ecommerce Means Absolute Freedom

Don't lock your ecommerce business to the limited number of features SaaS platform providers give you. Choose unlimited customization possibilities with X-Cart — the best enterprise software for eCommerce. Either you need to generate a new complex report or automate something, just develop it.

# Features
