

Social Tabs

Social Tabs: [Social Tabs](#) is a brilliant sliding social media tab module and super useful for your social media needs and it is very slick in design. This module can be applied at both side of web page (right and left)

1. Popular social media (Facebook, Twitter, YouTube, Google plus, LinkedIn, Pinterest, Instagram, Foursquare, Vk, Sound Cloud).
2. All browser working.
3. Fully configurable from admin.
4. Slick design.

That's why [webkul](#) created an awesome module for fetching your profile newsfeeds into X-Cart site automatically.

It's a **DEMO STORE**. No real products. No real orders.

demo online store is powered by X-Cart 5 shopping cart software. With X-Cart 5 you can setup a web store having all of the res this demo has.

: **service is for demo purposes only.** No real products. No real prices. No real charges. This is a demonstration. Please do not nit real credit card information.

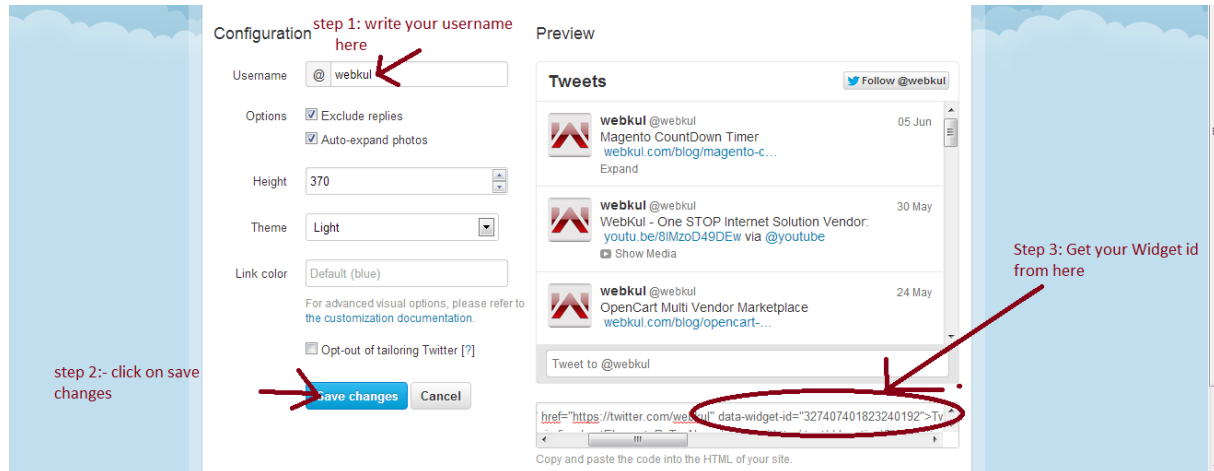

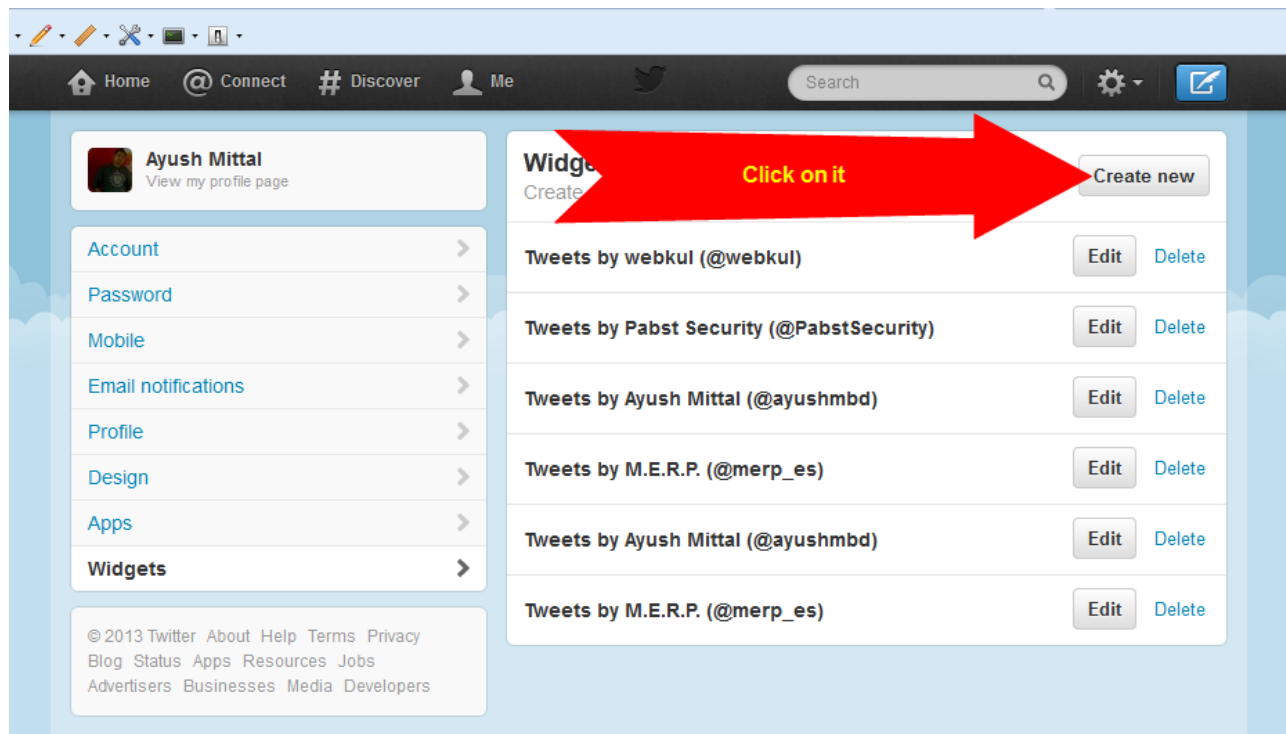

How to Use: This module is really very handy to use you just need to care about the following parameter that will show below on the pics and that's it, it is so simple to use.

How to Get Twitter Widget Id:- firstly go to the link:

<https://twitter.com/settings/widgets>

In that link you have to follow 3 steps which is ment ion in the snapshot Given below:

- Step 1:- write your username
- Step 2:-click on the save changes
- Step 3:-Get the widget id

How to Get API Key

* Get your free Google+ API key

- Go to <https://code.google.com/apis/console#access>

- **Login** and click "**Create Project**".

- There having **Services** menu, under Services menu there having **Services** list i.e. **All services**.

The screenshot displays the Google APIs console interface. On the left, a sidebar contains a menu with 'Overview', 'Services' (highlighted with a red box), 'Team', and 'API Access'. The 'Services' menu item has a sub-menu labeled 'Services'. The main content area is titled 'All services' and includes a subtitle 'Select services for the project.' Below this, there is a table with two columns: 'Service' and 'Status'. The table lists four services: 'Ad Exchange Buyer API', 'Ad Exchange Seller API', 'AdSense Host API', and 'AdSense Management API'. The 'Status' column shows 'OFF' for the first three services and 'Request access...' for the AdSense Host API.

Service	Status
Ad Exchange Buyer API	OFF
Ad Exchange Seller API	OFF
AdSense Host API	Request access...
AdSense Management API	OFF

- Under **Services** list, click "**off**" button next to "Google+ API" to turn it on.
- **Accept** the agreement.

Google APIs Terms of Service

Last modified: December 9, 2011

Thank you for using Google's APIs. These APIs are provided by Google Inc., 1600 Amphitheatre Parkway, Mountain View, CA 94043, United States.

These terms outline your rights and responsibilities when using our APIs. If you use our APIs in conjunction with additional terms of service, terms within the accompanying API documentation, or other Google services, the additional terms apply for that conflict. If you use our APIs in conjunction with other Google services, then the terms for such products and services also apply.

Section 1: Account and Registration

Accepting the Terms. You may not use the APIs and may not access them if you are a person barred from using or receiving the APIs under the applicable laws of your country of residence or from which you use the APIs.

Your Google Account. You may need to create a Google account in order to use the APIs, or you may use an existing Google account. If you are using a Google account, you may affect that account. It's your responsibility to keep your password secure.

☒ I agree to these terms.

- From the left menu, Go to "**API Access**" and copy your **API key**.

API Access

To prevent abuse, Google places limits on API requests. Using a valid OAuth token or API key

Authorized API Access

OAuth 2.0 allows users to share specific data with you (for example, contact lists) while keeping their usernames, passwords, and other information private. A single project may contain up to 20 client IDs. [Learn more](#)

[Create an OAuth 2.0 client ID...](#)

Simple API Access

Use API keys to identify your project when you do not need to access user data. [Learn more](#)

Key for browser apps (with referers)

Atul Saini 3
mysongs

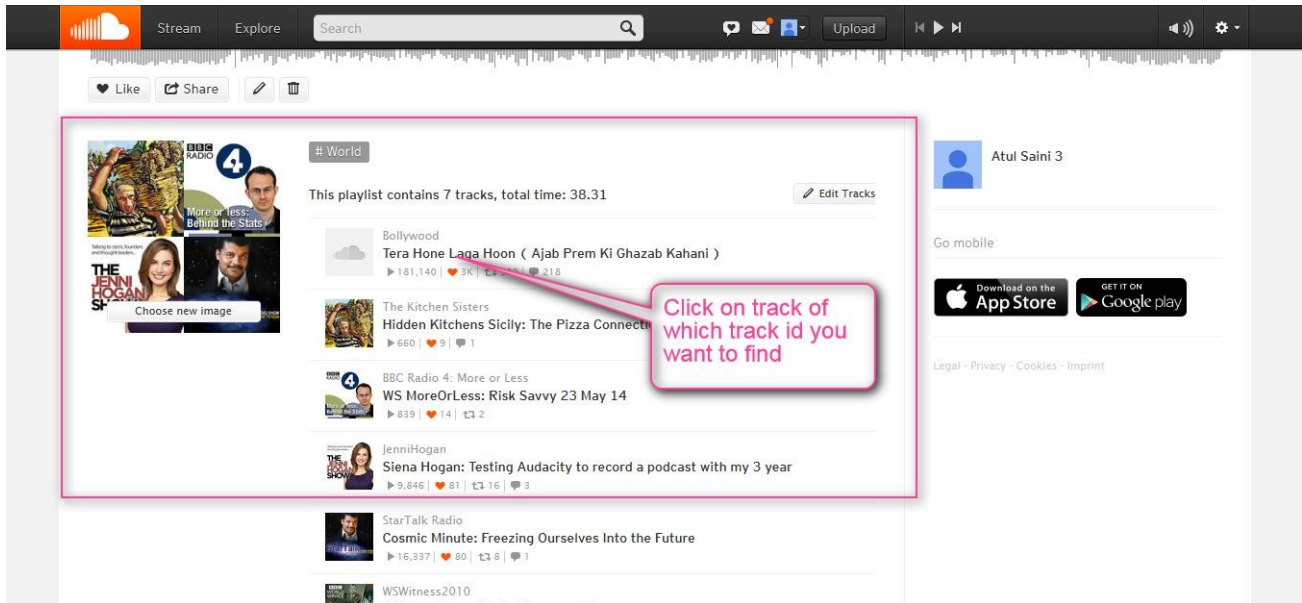

8 days

Step 3: Click on track of which you want to find track id.

Step 4: Click on share button

Step 5: A popup open click on Embed

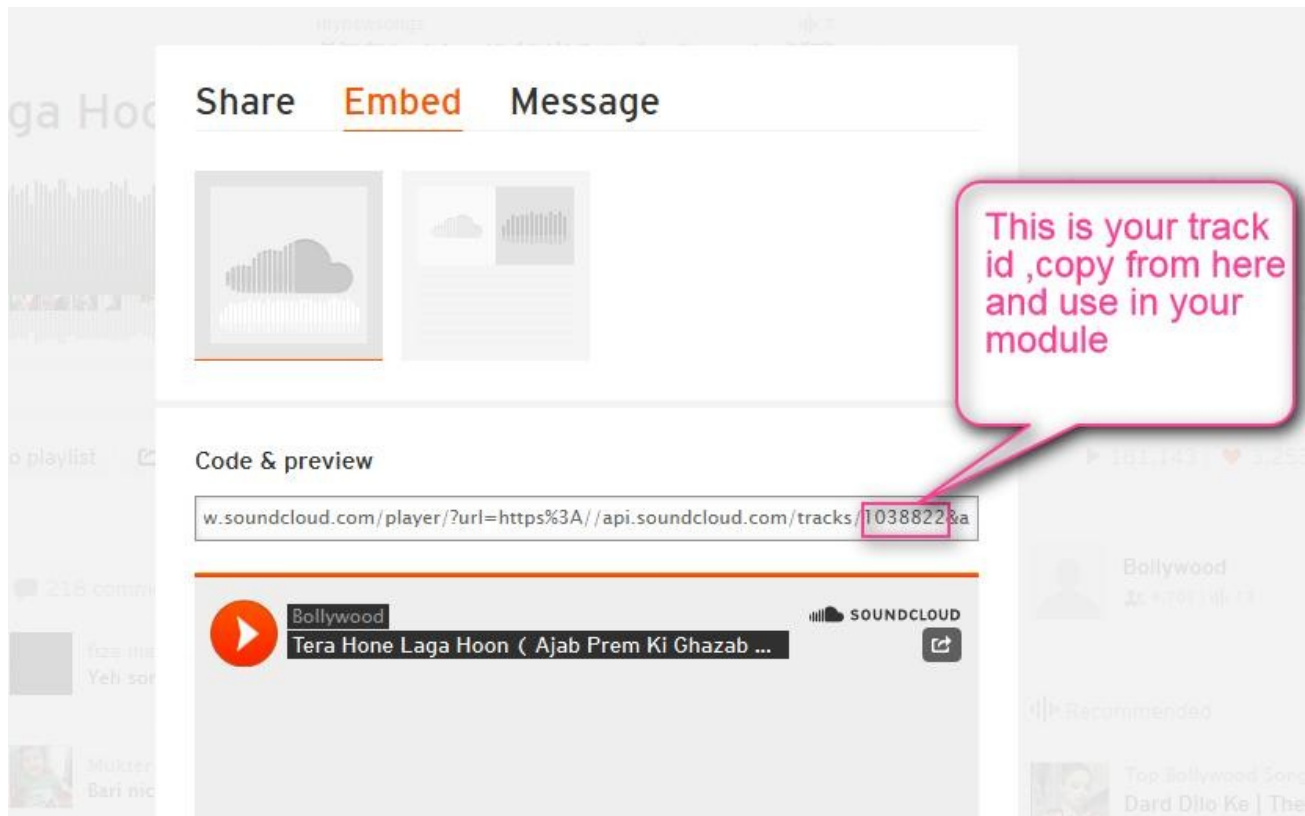

Step 6: On the same page extract track id from code and preview.

Important note:

Code and preview structure is like this: '`<iframe width="100%" height="450" scrolling="no" frameborder="no" src="https://w.soundcloud.com/player/?url=https%3A//api.soundcloud.com/tracks/1038822&auto_play=false&hide_related=false&show_comments=true&show_user=true&show_reposts=false&visual=true"></iframe>`'

Above highlighted **1038822** is your track id that is in src attribute after tracks trackid is placed, Copy it and use in your module

Follow the above steps and get track id of any song you want.

How to get Playlist id:

Step1: Go to this url '<https://soundcloud.com>' and login if not already login

Step2: In your playlist click on share button

This is your stream

Follow your favorite artists, labels and friends on SoundCloud and see every track they post right here.

The screenshot shows the SoundCloud profile of 'Atul Saini 3 mynewsongs'. A pink callout box with the text 'This is your sound cloud playlist, click on share button here' points to the 'Share' button in the interaction bar. Below the profile, a list of tracks is visible:

Track Name	Plays
Bollywood - Tera Hone Laga Hoon (Ajab Prem Ki Ghazab Kahani)	181,153
The Kitchen Sisters - Hidden Kitchens Sicily: The Pizza Connection	660
BBC Radio 4: More or Less - WS MoreOrLess: Risk Savvy 23 May 14	839
JenniHogan - Siena Hogan: Testing Audacity to record a podcast with my 3 year	9,849
StarTalk Radio - Cosmic Minute: Freezing Ourselves Into the Future	16,338

A link 'View all 7 tracks >' is located at the bottom of the track list.

Step3: A popup came click on Embed.

The screenshot shows the 'Share' menu that appears when the 'Share' button is clicked. The 'Embed' option is highlighted with a pink callout box containing the text 'Click here'. Below the menu options, the 'Code & preview' section is visible, showing an iframe code snippet:

```
<iframe width="100%" height="450" scrolling="no" frameborder="no" src="https://w.soundcloud.com/player/?url=https%3A%3Aapi.soundcloud.com/playlists/1234567890&visual=true"></iframe>
```

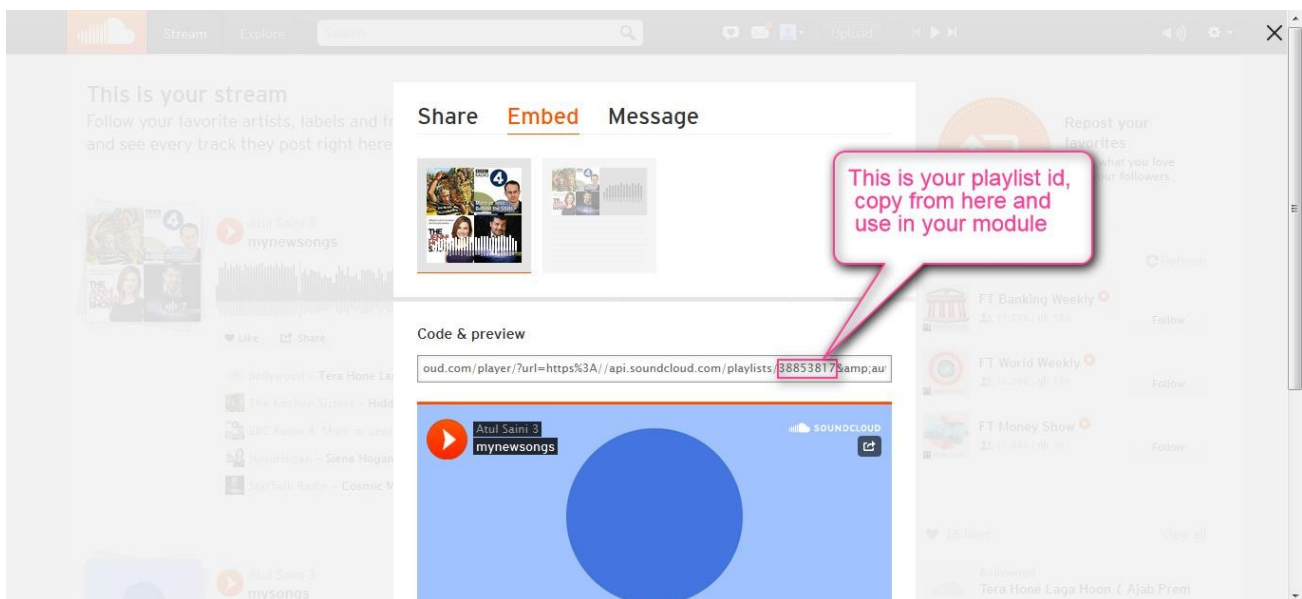

Below the code is a preview of the embedded player, which displays the SoundCloud logo and the user's profile picture.

Step4: Note down playlist id and use in your module.

Important note:

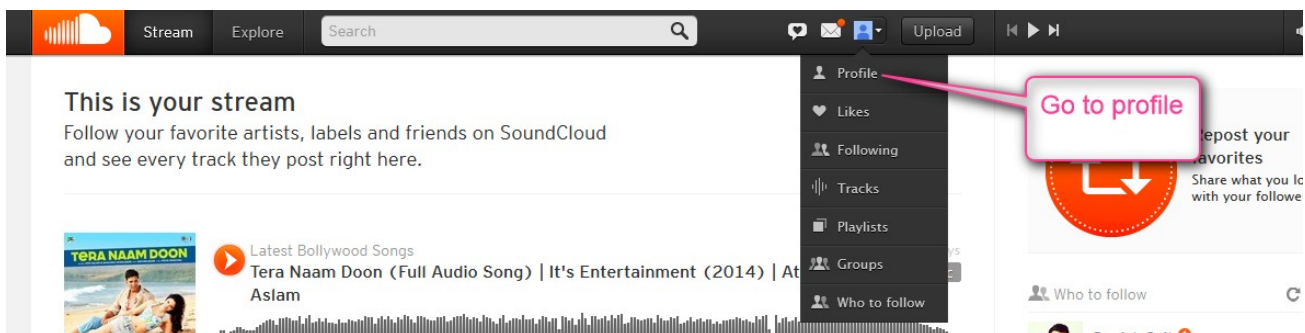

Code and preview structure is like this: '`<iframe width="100%" height="450" scrolling="no" frameborder="no" src="https://w.soundcloud.com/player/?url=https%3A//api.soundcloud.com/playlists/38853817&auto_play=false&hide_related=false&show_comments=true&show_user=true&show_reposts=false&visual=true"></iframe>`'

Above highlighted **38853817** is your playlist id that is in src attribute after playlists playlistid is placed, Copy it and use in your module

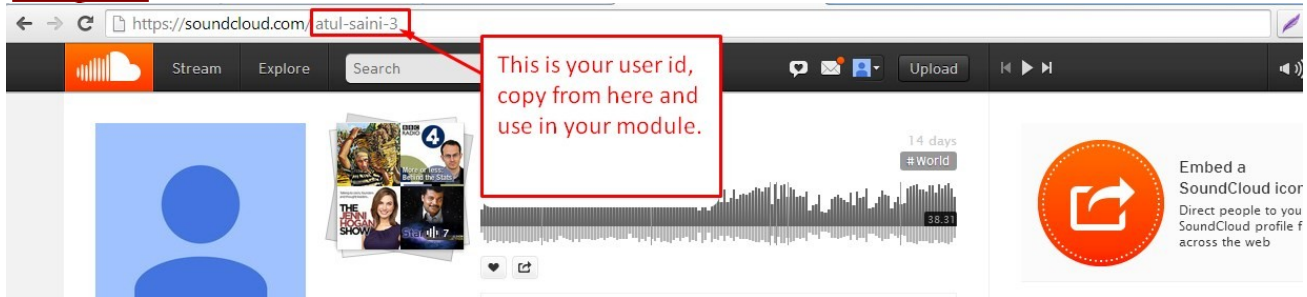

How to get User Id:

Step1: Login into Sound Cloud account and go to profile.

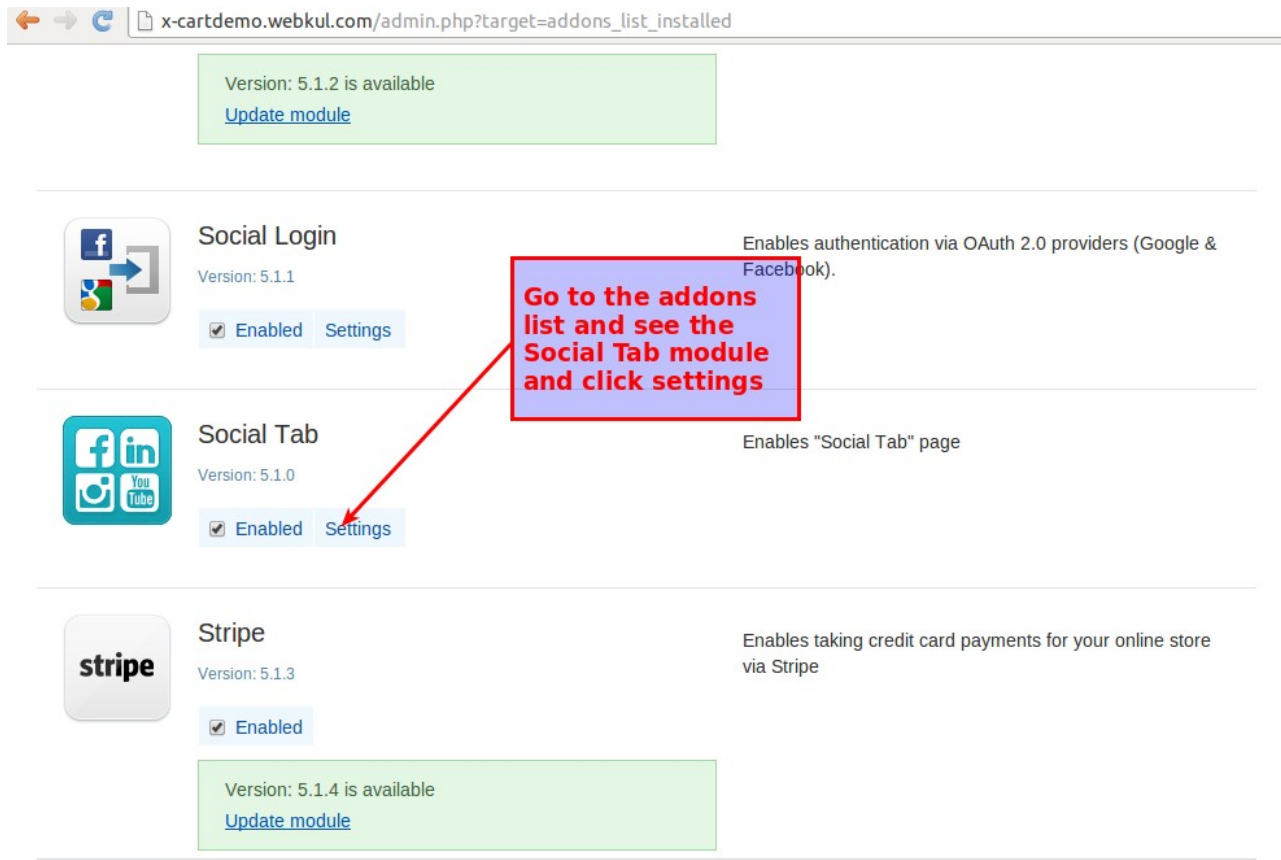

Step2: Note Down User id from the Same page.
